Dear Ms. Phillips:

It was nice speaking to you on the bus tour. I have referred your inquiry to the CA Department of Public Health (CDPH) to help answer your questions. They are the lead Agency for the radiological survey at The Shipyard development. They will contact you directly. If you have more concerns, send the questions by email to: RHBHuntersPointParcelAScan@cdph.ca.gov. The CDPH has been updating the public every week at www.cdph.ca.gov/Programs/CEH/DRSEM/Pages/RHB-Environment/Hunters-Point-Naval-Shipyard-Parcel-A-1-Survey.aspx/#.

I hope this is helpful, Jackie

Hi Jackie,

It was a pleasure to sit next to you on the Shipyard bus tour last week. You were really informative, I really appreciated the information you shared.

I read an article this morning about a radioactive object found in Parcel A. Can you help me understand the severity of this finding?

I thought Parcel A had no history of radioactive activities, and thus should be safe and that's why it wasn't tested previously.

Any insight you can offer is appreciated. I've CC'd my husband Tushar Narayan as we're both curious to learn more.
